CONTENTS

NUMBER 1

D. Lee and M. Choi	1	Coalescence enhanced synthesis of nanoparticles to control size, morphology and crystalline phase at high concentrations
P. T. Spicer, O. Chaoul, S. Tsantilis and S. E. Pratsinis	17	Titania formation by $TiCl_4$ gas phase oxidation, surface growth and coagulation
A. Maisels, F. E. Kruis and H. Fissan	35	Mixing selectivity in bicomponent, bipolar aggregation
V. N. Piskunov and A. I. Golubev	51	The generalized approximation method for modeling coagulation kinetics—Part 1: justification and implementation of the method
V. N. Piskunov, A. I. Golubev, J. C. Barrett and N. A. Ismailova	65	The generalized approximation method for modeling coagulation kinetics—Part 2: comparison with other methods
W. S. Seames, J. Sooroshian and J. O. L. Wendt	77	Assessing the solubility of inorganic compounds from size-segregated coal fly ash aerosol impactor samples
V. Mugica, M. Maubert, M. Torres, J. Muñoz and E. Rico	91	Temporal and spatial variations of metal content in TSP and PM10 in Mexico City during 1996–1998
W. C. Su and J. H. Vincent	103	New experimental studies to directly measure aspiration efficiencies of aerosol samplers in calm air
I. Salma, I. Balásházy, R. Winkler-Heil, W. Hofmann and G. Záray	119	Effect of particle mass size distribution on the deposition of aerosols in the human respiratory system
A. J. Armendariz and D. Leith	133	Concentration measurement and counting efficiency for the aerodynamic particle sizer 3320
E. Hesse, Z. Ulanowski and P. H. Kaye	149	Stability characteristics of cylindrical fibres in an electrodynamic balance designed for single particle investigation

B. Zhao and E. Bar-Ziv 165 Further development of temperature determination for a heated micron-sized particle from forced convection

F. Prodi, G. Santachiara and C. Cornetti 181 Measurements of diffusiophoretic velocities of aerosol particles in the transition region

189 News Items

205 Erratum

NUMBER 2

A. Tippe, U. Heinzmann and C. Roth 207 Deposition of fine and ultrafine aerosol particles during exposure at the air/cell interface

W. Hofmann, B. Asgharian and R. Winkler-Heil 219 Modeling intersubject variability of particle deposition in human lungs

N. J. Kennedy and W. C. Hinds 237 Inhalability of large solid particles

Z. Zhang, C. Kleinstreuer and C. S. Kim 257 Cyclic micron-size particle inhalation and deposition in a triple bifurcation lung airway model

C. Calderon, E. Ward, J. Freeman and A. McCartney 283 Detection of airborne fungal spores sampled by rotating-arm and Hirst-type spore traps using polymerase chain reaction assays

Y.-M. Kuo and C.-S. Wang 297 Droplet fractionation of hexavalent chromium from bubbles bursting at liquid surfaces of chromic acid solutions

P. Tekasakul and S. K. Loyalka 307 Evaporation from non-spherical particles: the equivalent-volume and inscribed sphere approximations for nearly spherical particles

D. L. Wright, S. Yu, P. S. Kasibhatla, R. McGraw, S. E. Schwartz, V. K. Saxena and G. K. Yue 319 Retrieval of aerosol properties from moments of the particle size distribution for kernels involving the step function: cloud droplet activation

I. Salma, W. Maenhaut and G. Záray 339 Comparative study of elemental mass size distributions in urban atmospheric aerosol

K. E. J. Lehtinen and M. R. Zachariah 357 Energy accumulation in nanoparticle collision and coalescence processes

L. Mädler, H. K. Kammler, R. Mueller and S. E. Pratsinis — 369 — Controlled synthesis of nanostructured particles by flame spray pyrolysis

Technical Note

A. Fladerer, M. Kulmala and R. Strey — 391 — Test of the applicability of Kulmala's analytical expression for the mass flux of growing droplets in highly supersaturated systems: growth of homogeneously nucleated water droplets
